In 2018, our founder Haufei Hwang was trekking in the Northwest of Thailand and fell badly ill halfway. He was taken to a village nearby and received treatment there. Local villagers took care of him with what they had, although they didn't understand each other's language. Name of the village - Na Giean - is how our brand name came to be (Na Giean means "plough" in Thai). The houses in the Na Giean village inspired design of our logo.

Little but Vital; Common but Uncommon - it's why we decided to create a sock brand. We dedicate ourselves to provide you the best Merino wool socks, which we hope will inspire you to go outdoors, to explore the unknowns and to share your adventure stories with the people encountered en route. Our goal is to be your reliable backup, supporting you in each effort of hiking further and running longer.

OUR STORY

If Na Giean can be part of your story and memories in exploring the world - that would be the greatest honor we can achieve.

ABOUT MERINO WOOL

10,000 years ago, people started to make clothing out of wool. Now wool is still an excellent natural material for people who seek a high level of performance and comfort from what they wear. Among all different wool, Merino wool is the most well-known type.

Why Merino wool is special?

Soft and Comfortable

Merino wool comes from Merino sheep. The wool they produce has much smaller diameter after they are made into fibers. The slimmer the individual fibers, the softer a fabric made from that material fabric will feel. Merino wool fibers are typically less than 20 microns in diameter - As a contrast, a human hair's diameter is 75 microns.

Temperature-regulating

Merino wool is a four-season material. It keeps you warm in winter and cool in summer. As a hiker, when you hiking from flat country to peak, you can wear same pair of socks without worrying your feet would catch a cold.

Moisture - wicking

Unlike synthetic fibers, Merino wool is super breathable therefore it's excellent in moisture - wicking. Besides, it can absorb and retain up to 30% of its own weight in water without feeling wet. By keeping your feet dry during the trail, it protects your feet from blisters.

Odor Resistant

Merino wool is odor-resistant. It's natural anti-microbial property can absorb bacteria and stop them growing on the surface of Merino fibers, therefore you can wear the socks for days without needing to wash them.

Sustainable and Eco-friendly

Merino wool is naturally 100% ecological. Since it's a fabric that doesn't have to be washed as often as others, by which we save water and energy. And, Merino wool is biodegradable, it will naturally decompose without adding toxins to the environment.

HIKING SOCKS

Na Giean hiking socks are designed to help hikers feel supported on the trail. Available in different sock heights and types of cushion, whether you are a thru-hiker or a day hiker, whatever flat country or summit, you can pick the right fit here for your feet.

With cushion throughout the entire sock, this heavyweight crew hiking socks give your feet maximized warmth and protection. Whatever cold weather or rugged terrain, it stands with you going through all challenges.

Boulder Way Hiking Socks Collection

Boulder Way Films is a video/photo studio located in Bergamo, Italy. All three founding members - Federico, Michele and Davide - are passionate about outdoors.

Boulder Way Films is synonymous with Adventure, Exploration and Nature. The search for breathtaking places, extraordinary people who live far from the norm, unbelievable finds in the midst of nature and lost routes at the edge of the world are what they always search for. Via their photos and documentaries, they want you to enjoy these great moments.

The Boulder Way hiking socks collection is a collaborative effort between Na Giean and Boulder Way Films. The homonymous collection reflects both Boulder Way Films and Na Giean's way of being and philosophy: to inspire people to get outdoors, to explore the unknown and to share stories of adventures.
