ABOUT VOLVEN

We won't hide it. We have a similar story to many outdoor brands. It all started with a passion, with a backpack full of experiences that we gathered in the mountains and in the outdoor business. Our brand was founded in 2005. From the very beginning, our actions were not a coincidence, but a response to the needs of the market and our customers.

Needs - they are the driving force behind our actions and the spark from which every one of our products and projects takes its beginning. Volven was born at a time when there was a gap in the domestic outdoor market. Polish brands that created high-quality equipment for Polish tourists and their wallets were disappearing. Taking advantage of the opportune moment and our experience, we embarked on the production of equipment and clothing for outdoor enthusiasts.

You could say we already have our history, but instead of looking back, we prefer to look to the future. In 2021, we came to the conclusion that it was time for a change. It was then that we changed the Volven brand logo. And even though you can still find products with the old brand logo in stores, they were all created with the same „philosophy” of producing equipment, and the same goal guides them.
